Propositions of writing

Papers should be written in MS Word, font Times New Roman 10, paper format A4.

Margins - left and right 40mm, top and bottom 53mm.

Paper - maximum 10 pages, single spacing.

Title - maximum 80 characters (with spaces).

Summary – maximum 1.500 characters (with spaces).

Key words – 3 to 5, one line below Summary.

TITLE OF PAPER

Wayne ROONEY[1*], Ryan J. GIGGS[1], David De GEA[2]

**E-mail of corresponding author: wrooney@manun.uk*

[1] Department, Institution, Address, Country
[2] Different Department, Institution, Address, Country

For original scientific papers the text should be divided in sections:

Summary

Authors should indicate the research topic and the main conclusion.

Introduction

Short overview which explained the reasons for the research of the paper. In the all paper citations, the literature (authors) as follows: (Kroos, 2017) – one author; (Kroos and Modrić, 2017) – two authors and (Kroos et al., 2017) three or more authors.

Frequent self-citations are not a desirable form of writing.

Materials and methods

It is necessary to provide information on the material (e.g. origin, technical i physical properties).

All used agricultural techniques as well as devices and instruments should state the name of the producer, the model, the year and the country of origin.

All conducted research should include methods on which the results are obtained.

All units should be written e.g.: m s^{-1}, km h^{-1}, MJ kg^{-1}

Results and discussion

Titles of tables and figures should be written as plain text above tables and below figures.

Table xx. Caption

Figures, photos, charts and tables should be incorporated in the text but figures, photos, charts and tables should be also send as separate files in original programs that they are made (Excel, CorelDraw, Adobe Photoshop, etc.).

The discussion should not be merely repetition of the obtained results. Authors should compare their own data with data obtained in relevant scientific literature.

Conclusions

The most important thesis already stated in the previous sections.

Acknowledgements (if any)

References

Literature should be listed in alphabetical order as plain text:
