

### **Propositions of writing**

Papers should be written in MS Word, font Times New Roman 10, paper format A4.

Margins - left and right 40mm, top and bottom 53mm.

Paper - maximum 10 pages, single spacing.

Title - maximum 80 characters (with spaces).

Author's name - one line below Title.

Author's address - one line below Author's name.

Abstract - each paper should have an abstract, positioned one line below Author's address.

Key words – 3 to 5, one line below Abstract.

#### TITLE OF PAPER

(The title should be short, specific, and informative; avoid abbreviations and formulae where possible)

Wayne ROONEY<sup>1\*</sup>, Ryan J. GIGGS<sup>1</sup>, David De GEA<sup>2</sup>

*\*E-mail of corresponding author: wrooney@manun.uk*

<sup>1</sup> *Department, Institution, Address, Country*

<sup>2</sup> *Different Department, Institution, Address, Country*

\*Clearly indicate who will handle correspondence at all stages of refereeing and publication.

For original scientific papers the text should be divided in sections:

### **Abstract**

Authors should indicate the research topic and the principal results and major conclusions. References to other papers are not allowed. Not longer than 1.500 characters.

### **Introduction**

Short overview which explained the reasons for the research of the paper. In the all paper citations, the literature (authors) as follows: (Kroos, 2017) – one author; (Kroos and Modrić, 2017) – two authors and (Kroos et al., 2017) three or more authors.

Frequent self-citations are not a desirable form of writing.

### **Materials and methods**

It is necessary to provide information on the material (e.g. origin, technical and physical properties).

All used agricultural techniques as well as devices and instruments should state the name of the producer, the model, the year and the country of origin.

All conducted research should include methods on which the results are obtained.

All units should be written e.g.:  $\text{m s}^{-1}$ ,  $\text{km h}^{-1}$ ,  $\text{MJ kg}^{-1}$

### **Results and discussion**

Titles of tables and figures should be written as plain text above tables and below figures. Tables and figures should be placed to the relevant text in the article.

Figures, photos, charts and tables should be incorporated in the text, but figures, photos, charts and tables should be also send as separate files in original programs that they are made (Excel, CorelDraw, Adobe Photoshop, etc.).

The discussion should not be merely repetition of the obtained results. Authors should compare their own data with data obtained in relevant scientific literature.

### **Conclusions**

The most important thesis already stated in the previous sections.

### **Acknowledgements (if any)**

## **References**

Papers should contain minimum 10 references published in the last 10 years (minimum 3 references from the last 3 years).

Literature should be listed in alphabetical order as plain text:

### Journal article

Johansson, K., Kennedy, B.W., Quinton, M. (1993). Prediction of breeding values and dominance effects from mixed models with approximations of the dominance relationship matrix. *Livest Prod Sci* 34, 213-223.

### Congress article

Uimari, P., Kennedy B.W. (1990). Mixed model methodology to estimate additive and dominance genetic values under complete dominance. In: Hill W.G., Thompson R., Wooliams J.A. (eds) *Proc 4th World Congr Genet Appl Livestock Prod*, vol 13, Edinburgh, Scotland, 297-300.

### Book and chapter from book

Kempthorne, O. (1957). *An introduction to genetic statistics*. John Wiley and Sons, New York.

Kennedy, B.W. (1990). Use of mixed model methodology in analysis of designed experiments. In: *Advances in Statistical Methods for Genetic Improvement of Livestock* (Gianola, D., Hammond, K., eds), Springer-Verlag, Berlin, 77-97.

### PhD and MSc theses

Rooney, W. (2005). The name of the theses. Doctoral thesis. Institution, Country.

The Scientific Committee will also take into consideration the preliminary communications, review (minimum 20 references with 5 references from the last 3 years) and expert papers.

Authors can send their papers as attached files via e-mail to following address: [atae@agr.hr](mailto:atae@agr.hr)
